

Media Author Instruction Manual

1. LOGIN SCREEN

When the application launches, a splash screen quickly appears and is followed by the login screen. After logging in, the user is taken to the Homescreen.

2. HOMESCREEN

On the homescreen there is a sliding menu on left side, which includes all the other menu sections:

1. Homescreen
2. Videos
3. Pictures
4. Playlists
5. Magazines
6. Web
7. Subscribe
8. Logout (optional)

The homescreen is comprised of either a video or a photo background. These options are selected from the Cloud “Settings” menu.

Landscape Homescreen

Portrait Homescreen

3. iCarousel View

All photos, videos, playlists use the iCarousel feature so users can browse and scroll extensive media libraries.

A) VIDEOS

If a user selects the Videos option on the menu, they will be navigated to the next view in which the user will see thumbnails of Videos in iCarousel effect, wherein, a user can scroll and view all the thumbnails of Videos.

Users can double tap on a thumbnail of a video to play it on the screen. If a user opens the videos for the first time, then it takes some time to download the video from the server. And when download is completed, then it starts playing the video. Only videos added in the Cloud will appear in the videos iCarousel. Please note each video will feature a thumbnail, the thumbnails are selected via Cloud as well.

B) PICTURES

In the iPad app, upon tapping “PICTURES” section, all the pictures that were added in Cloud will appear in the iCarousel effect and the user can view them in full screen mode by double tapping on particular picture thumbnail. The pictures also have the capability to be zoomed in and out. Users can also swipe left/right to view the next picture. Pictures are on a carousel, so after the last picture is displayed, if the user swipes again, then it comes back to the first pictures.

c) PLAYLISTS

When selecting “Playlists” in the app menu, the user will be able to view the same list of playlists that were created in Cloud. The user will choose between two playlist options: Picture playlist or Video playlist.

COLLEGE FOOTBALL

Buffs driven by defense

By Steve Hemphill
The Daily Times Call

BOULDER — When the final whistle sounded on Saturday, the University of Colorado football team was in a territory that hasn't been visited in some time. Two wins, one loss. For the Buffs, that points out to be a winning record.

Now there's plenty of football still to be played in 2003. While threats of foul being allowed to wear helmet logos on game day may be in the past, the Buffs are still five victories away from being bowl eligible.

And the Big 12 season (which will be highlighted by a three-game stretch in October against Kansas State, Texas A&M and Texas) has yet to begin.

Still, there is one obvious difference with what's happening in Boulder this year compared to last season. It starts with the defense.

Three games into the season, the Colorado defense has essentially gone three weeks in a row without allowing opposing offenses to gain more than 200 yards. SAC Steve Strickland ended up with 20 yards on Saturday, but a sizable amount came against the Buffs' backups in the 33-13 rout.

How big of a difference is that? Consider that all but two opponents piled up at least 400 yards last year against the Buffs, and everyone got over 300.

Instead of wondering which defender is going to mess up next (that it was last season), now the question is who's going to come up big? There doesn't seem to be a shortage of names right now.

"Anytime the defense has played like they have the last three games, that happens," CU coach Gary Barnett said after Saturday's victory. "Once you get that competition going between guys trying to make plays, that's what happens. We didn't have that last year, but we've got it now."

Leading the way for the defense may be the biggest surprise of all — the secondary. After being regarded as more targets early last season, the CU defensive backs have produced six interceptions and three touchdowns in the last two games.

"They've been playing unbelievable," said defensive tackle and captain Justin Bannan. "If you compare them to last year, it's like light years difference."

"And they're all the same guys. They're doing a great job — I can't say enough about them. They're getting interceptions and turnovers are key momentum hitters."

While the defensive backs deserve much of the credit for their turnaround, Bannan said things have improved elsewhere on the defense, too.

Since fans and other outside observers pay attention mainly to the end results, the fact that the Buffs were getting beat so often last year is garnering most of the attention Bannan said he and his fellow linemen were having to do their part, too.

"Last year, it wasn't just their fault," said Bannan, who finished with two tackles on Saturday. "I was just as much our fault as anyone. We've all made improvements and all made strides. We just have to keep going. They have to rely on us as much as we have to rely on them. That's how you build a trust among your selves. Each week, you need to get better and better."

Since there are tougher opponents on the horizon, next Saturday's game at Washington State is a good example, Bannan said, what the Buffs have accomplished should only be considered the ground floor of a season-long building process. In other words, there is still work to be done.

"The attitude is growing each week," Bannan said. "That's very important if we want to be the defense we're striving to be. Each week we have to improve, we have to get better and we have to grow."

Winning also provides another nice byproduct, Bannan said. Unlike last year, when at times defensive players were afraid to even look at each other, the team's unity is having a chance to develop.

"I'm really impressed with it," Bannan said. "We all like each other a lot and it's really like a brotherhood out there. So far, so good... we still have a lot of areas to improve in, but we're making strides."

CU's Donald Strickland (4) is swamped by linemen Brandon Dubrows (26) and Marquan Harris (30) after Strickland returned an interception for a touchdown in the second quarter against San Jose State on Saturday.

5. MAGAZINES

When a user selects the “MAGAZINES” menu option, the magazines that appear were created by the user in the Cloud. Upon tapping a thumbnail in the magazine section, users will open that particular magazine and will be able to swipe to view next/previous pages with page-flip functionality.

Back

My CU Story

As a junior, Strickland earned honorable mention All Big 12 honors. He led Colorado in pass deflections 15 was second on the team in tackles 78. He made the most of his two interceptions that year, returning both for Touchdowns. He joined Victor Scott as the only CU players to have two interceptions returned for touchdowns in the same season.

His best game was against Kansas State, earning him codefensive player of the week honors in the Big 12. He had 10 stops three pass deflection, and a pair of third down stops.
